Date of Birth: 16th February,1997

Dhaka, Bangladesh

OBJECTIVE

Analytical and goal-focused professional with 4-year Computer Science degree and 3 years of experience. As a dedicated problem solver, I display an expert skill in Software Implementation and Software Support. Skilled at meeting with clients to discuss specific requirements, creating test apps, generating code for websites, collaborating with other designers and developers, as well as troubleshooting technical issues. Through my time at MISL, I have gained further hands-on experience in industry standard development, which I'm looking to apply to a growing business.

SKILLS

- Analytical skills to assess any problem and carry out necessary steps towards solving it
- Excellent interpersonal and communication skills
- Experienced in working with a team in corporate work environment
- Adaptability for working in any type of situation & open to change according to environment
- Brilliant problem solving abilities and decision-making skills to take a complex problem,
  and find the most viable solution to it
- Strong programming foundation with knowledge in software development life cycle
